

Anjuna Surf & Sunset Villas — Management Takeover: Due Diligence Data Request

Data to obtain from the current operator (Balinest Villas) and the owner's records before management handover, so the incoming team starts from facts. Items already established by the independent public audit (12 July 2026) are pre-filled — the remainder must come from internal records.

Property: **Anjuna Surf & Sunset Villas, Thomas Beach, Uluwatu** Candidate operator: **Fadjri D. Roesman, cSMH** Date: **July 2026**

✓ **green** — already answered by the public audit (verify against internals) ☐ **open** — request from owner / current operator

1. Financial data · *Data Keuangan (last 2–3 years)*

- | | |
|--|---|
| ☐ Profit & Loss statements | ☐ Balance Sheet |
| ☐ Cash Flow statements | ☐ General Ledger |
| ☐ Bank statements | ☐ AR / AP aging |
| ☐ Tax reports | ☐ Cost structure: payroll % · utilities % · OTA commission % · maintenance % · marketing % · laundry % |
| ☐ Net profit margin & liabilities | ☐ Monthly revenue / occupancy / ADR / RevPAR trend |

PRE-FILLED BY PUBLIC AUDIT — VERIFY AGAINST INTERNALS

- ADR signal: 2BR lead-in **\$144/night** (non-refundable), 1BR from ~\$66 — vs Uluwatu median ~\$216, 2–3BR ADR ~\$259. Expect internal ADR well below market.
- RevPAR estimate ≈ **\$122/available night** — parity with the average Uluwatu listing despite 4.9★-level reviews.
- OTA contribution: expect near-100% of bookings OTA-sourced → heavy commission line.

2. Villa operations · *Data Operasional Villa*

- | | |
|--|--|
| ☐ SOPs: front office · housekeeping · engineering · guest complaint · emergency | ☐ Occupancy history (per unit, monthly) |
| ☐ Complaint records & maintenance log | ☐ Accident / incident reports |
| ✓ Guest review scores — Airbnb 4.87–5.0★/unit (B1: 86 reviews), Booking 8.7/10, Staff 9.5 | ✓ Superhost / partner status — Superhost + Guest favorite confirmed |
| ✓ Channels live — Airbnb, Booking, Agoda, Trip.com/Ctrip, Marriott H&V, Guesty direct | ✓ Channels absent — Expedia/Vrbo, Traveloka, TripAdvisor, metasearch, luxury agencies |
| ☐ OTA commission levels & property ranking (extranet) | |

CRITICAL ASK

Full unit census: how many villas are completed vs listed vs held back. Public search surfaces only ~10–15 live units; Palms (15 townhouses, due Jun 2026) has no rental presence anywhere. Whatever the exact number, bookable inventory is a fraction of the estate — this caps booking volume before anything else.

3. Running contracts · Kontrak yang Masih Berjalan (hidden obligations)

- | | | |
|--|---|---|
| ☐ Laundry | ☐ Internet | ☐ Security |
| ☐ Pest control | ☐ Pool maintenance | ☐ Accounting |
| ☐ Digital marketing | ☐ Long-stay guests | ☐ Corporate agreements |
| ☐ Travel-agent agreements | | |

MANAGEMENT AGREEMENT WITH BALINEST — EXAMINE BEFORE ANY TERMINATION NOTICE

Base fee · incentive fee · revenue share · owner & operator obligations · **termination clause** · **non-compete** · and above all: **who owns the OTA listings and their review history**. Airbnb/Booking account transferability is the single biggest handover risk — losing B1's 86 reviews means every unit relaunches from zero.

4. Assets & building condition · Data Aset & Kondisi Bangunan

- | | | |
|---|---|--|
| ☐ Furniture inventory | ☐ Linen stock | ☐ Kitchen equipment |
| ☐ AC units & condition | ☐ TVs / electronics | ☐ Generator |
| ☐ Pool equipment | ☐ Structure / roof / waterproofing | ☐ Plumbing & electrical |
| ☐ Septic tank | ☐ Pool leakage | ☐ Engineering audit / QS / property inspector |

PUBLIC FLAG

- Active phase-2 construction adjacent to operating villas (daily rock-breaker per guest reviews) and a nightclub next door (20:00–03:00). Inspect insulation, get the construction schedule, and plan noise mitigation — this is already visible in review subscores.

5. Digital & branding ownership · Data Digital & Branding

- | | |
|--|--|
| ☐ Website & domain | ☐ Company email accounts |
| ☐ OTA extranet access (all channels) | ☒ Channel manager / PMS — Guesty confirmed; only 1 Anjuna property indexed on the direct site |
| ☐ WhatsApp Business number | ☐ Instagram / Facebook / TikTok |
| ☒ Google Business Profile — does not exist for the rental operation; must be created, not transferred | ☐ Booking sources report · ROAS · SEO · repeat-guest % |
| ☐ Guest database export from Guesty (explicit handover item) | |

PRE-FILLED BY PUBLIC AUDIT

- No guest-facing rental brand exists anywhere (@anjunabay markets real-estate sales; operator's channels target villa owners). Expect no ROAS/SEO/database of substance to inherit — plan to **build**, not migrate.

6. Business reputation · *Data Reputasi Bisnis*

- ☒ **OTA reviews** — strong: 4.87–5.0★ Airbnb, 8.7/10 Booking
- ☒ **Google reviews** — no rental profile exists
- ☐ Social media complaints
- ☐ Blacklist issues

READ

- Reputation is an asset to protect through the handover (see §3 listing ownership), not a problem to fix. Recurring themes to manage in copy: construction noise, nightlife, scooter access.

Advisory team & target outputs

- ☐ Property & hospitality lawyer
- ☐ Tax consultant
- ☐ Accountant / auditor
- ☐ Engineering inspector
- ☐ HR consultant — staff transfer: who employs the praised villa team; keeping them keeps the 9.5 Staff score

Output 1

Business plan & 2026 revenue target — built on internal actuals plus market benchmarks (Uluwatu median \$216; top-quartile \$313+).

Output 2

Post-takeover ROI estimate — inventory activation + repricing + direct-demand scenarios.

7. Revenue strategy after takeover · *Strategy Baru untuk Meningkatkan Revenue*

#	STRATEGY	AUDIT BACKING / HOW IT LANDS
1	Aggressive offline + online sales — beyond Airbnb only	Confirms audit leak: 5 channels live, most units single-channel. Add Expedia/Vrbo, Traveloka, TripAdvisor, metasearch, luxury agencies, corporate & travel-agent contracts.
2	Monetize the venue — weddings, birthdays, social events	New income stream; cliff-front + Anjuna Village commercial zone is an event asset. Needs owner sign-off + event SOP.
3	Collaborate with Canna Bali Beach Club for guest experiences	Cross-sell income + turns the nightlife-noise objection into a managed feature.
4	Fast response to every inquiry — email, WA, social, DM	Governed response layer: approved first reply <2 min, 24/7, qualification, D1/D3/D7 follow-up, escalation.
5	Dynamic rate strategy for revenue optimization	Confirms rate leak (\$144 vs \$216 median). Daily revenue management; reposition 2BR at \$210–300. Nearby benchmark (Bingin, same Guesty stack): 92% occupancy at +48% RevPAR.
6	Partner for prestigious events & new business	Extends #2; MICE/brand events.
+	List ALL completed inventory; onboard Palms on handover day	From the audit — the only move that multiplies booking <i>count</i> ; confirm exact availability in \$2.
+	Build the guest-facing brand; consolidate review equity	Google profile, landmark listing names, review continuity — protects and compounds everything above.

KEEP FROM THE CURRENT OPERATION

- The on-ground service standard (Staff 9.5, welcome-WhatsApp ritual) and the Guesty stack — change the commercial layer, not the hospitality.

Handover risk checklist — top 5

- 1 OTA listing & review-history transferability (Airbnb account ownership) — negotiate BEFORE any termination notice.
- 2 Termination + non-compete terms in the Balinest management agreement.
- 3 Staff continuity — who employs the villa team; re-hire terms to keep service scores.
- 4 Guest database export from Guesty.
- 5 Forward bookings ledger — deposits held by the current operator for stays after handover date.

Pre-filled items derive from an independent public-data audit (12 July 2026): OTA listing & review data, airbtics/airroi benchmarks, FazWaz & asia.villas project statuses, read via public search indexing. Figures marked as estimates are directional, to be verified against internal records during due diligence. Prepared by Selena Systems, Bali — independent; not affiliated with Anjuna Bay or Balinest Villas.
