

Positioning, Pricing & Go-To-Market

POSITIONING

"Brand-new cliffside pool villas, a short walk from Thomas Beach — the view, the private pool and the privacy people come to Uluwatu for, without the Canggu crowds."

For: couples/honeymooners + surfers first, then luxury & nomads. **Why it wins:** travelers' top-3 loves are exactly cliff/sunset view, private pool, quiet privacy — Anjuna has all three but sells unit codes. **Guardrail:** "next Canggu" sentiment + on-site construction is real — lean into quiet/private/walk-to-beach and disclose construction honestly.

The plan, step by step

1 Own website + Google YES

Anjuna's direct booking is the **weakest in the whole comp set** (Guesty, 1 unit indexed) while COZ, NOUR, Zylah, Young Villas, Uluwatu Surf all run own sites. Direct saves 15–18% commission + builds a guest database. You already have Guesty — it's design+config, not new tech.

- Fast mobile site, real-time availability, one page per villa, **WhatsApp button** (guests expect it), **book-direct incentive** (best rate + free airport transfer — answers the #1 complaint).
- **Google Business Profile — create it (missing).** Free; puts villas on Maps + the "villas in Uluwatu" map-pack.
- **Google Vacation Rentals / free booking links** — direct site shows commission-free next to OTAs.
- **Google Ads: yes but small, after the profile+site** — (a) brand-defense on "Anjuna Bay villa"; (b) a tight "Uluwatu private pool villa" search campaign, geo AU/EU → direct site.

2 Own advertising — paid social YES

The Inspiration stage (30–180 days out) where Anjuna has zero presence. Small budget, tight targeting.

- **Creative = the top-3 loves:** cliff/sunset view, private pool, walk to Thomas Beach — sunset pool reels beat any text.
- **Targeting:** Australia first (dominant origin), then EU couples/honeymooners + surfers; retarget site/IG visitors.
- **Timing:** weight spend 2–6 months before AU/EU high season (their booking windows).
- Split the guest brand from @anjunabay (which sells real estate) — guests ≠ buyers.

3 SEO YES — PAIRED WITH ADS

- **Local SEO first** (fastest, missing): Google Business Profile + reviews flow — where "villa Uluwatu" map searches convert.
- **On-site:** one indexable page per villa with landmark benefit titles ("2BR Cliffside Pool Villa, 5-min walk to Thomas Beach"); fix the 5-page thin site + title typo.
- **Content (medium-term):** blog owning long-tail — "where to stay in Uluwatu for surfers", "honeymoon villa Uluwatu near Padang Padang" (how Uluwatu Surf Villas / Cabo win research-first guests).
- SEO is slow → Google Business + ads bridge the gap now.

4 Links

- **Link-in-bio (Linktree):** IG/TikTok → booking engine + WhatsApp + Google reviews (every strong rival has one; Anjuna none).
- **Consistent listing links/naming across OTAs** — same landmark name + photos everywhere (fixes B10-only-Booking, B3-only-Agoda fragmentation).
- **Earned/backlinks:** get into "best villas in Uluwatu/Bingin" roundups + surf-travel resellers (Perfect Wave, The Perfect Hideaway); partner links — Canna Beach Club, surf schools, wedding planners.
- Google Business + review links on the site and in post-stay follow-ups.

The first 3 target segments

SEGMENT	COUNTRIES	WHO	HOW TO REACH	PRICE
Couples / honeymoon	Australia, then UK/FR/DE, US	28–45, mid-high budget, want view+pool+romance, book 60–180d out	IG/Meta ads (AU/EU); Booking+Airbnb "romantic" copy; honeymoon roundups; direct site	1–2BR \$200–300 , free-cancel; direct = best + floating breakfast
Surfers (int–adv)	Australia, Brazil, EU, US	Solo/small groups, 14–60d window, weeks-long, want minutes to the breaks, value-conscious	Surf resellers (Perfect Wave), surf schools, surf forums, IG surf content, Single Fin-adjacent	1BR / group-share 2BR, value-to-mid ; long-stay discount; "walk to the break"
Digital nomads / long-stay	Brazil, Portugal, wider EU	Relocating from Canggu for a slower pace, monthly, need vetted fast wifi + desk	Nomad guides, coworking partners, "work-from-Uluwatu" IG, direct monthly rate + WhatsApp	Monthly discount ; lead with dedicated fiber + workspace

Owner contacts aren't public — owner-side first touch is IG DM @anjunabay or the site's WhatsApp; the pitch to the owner uses the audit + this plan.

Pricing — reprice with a guarded ladder

Today near the bottom of the set with the worst terms. Market: median ADR \$216, 2–3BR ADR \$259, top-25% \$313+.

1 BEDROOM

~~from \$66~~

\$110–140

2 BEDROOM

~~\$144 non-ref~~

\$190–240 · peak \$280+

3 BEDROOM

—

\$280–350

- **Add a free-cancellation rate** beside the non-ref one — rivals win on flexibility.
- **Fix rate parity** — direct must be the best price (+ perk); stop the "book on Airbnb for best rate" message.
- **Daily dynamic pricing** (PriceLabs-class). Benchmark: Lago Villas (Bingin, same Guesty stack) = 92% occupancy at +48% RevPAR vs market. Estimated lift: RevPAR ~\$122 → ~\$150–160 per available 2BR night.

What to improve — priority order

- #1 **List ALL completed inventory** on every major channel; onboard Palms on handover — multiplies booking count (the top lever).
- #2 **Rename every listing** to landmark benefit titles; kill unit codes; fix the typo + Agoda mismatch.
- #3 **Reprice + free-cancel + parity + dynamic pricing** — captures the ~24% rate gap.

- #4

Google Business Profile + own site + WhatsApp + book-direct incentive — closes the weakest-in-set direct-booking gap.
- #5

Consolidate review equity + start a Google review flow — lifts the 8.7 Booking flank, transfers proof to new units.
- #6

Manage construction/noise in copy (honest disclosure + mitigation) — protects the 4.9★ through 2026.
- #7

Add missing channels — Vrbo/Expedia, Traveloka, TripAdvisor, metasearch, luxury agencies, surf resellers.
- #8

2-minute response layer + weekly owner report — the pre-arrival WhatsApp guests expect + the owner visibility that's missing.

Keep (don't touch): the on-ground service (Booking Staff 9.5, welcome-WhatsApp), the Guesty stack, and the top-tier review ratings. Change the commercial wrapper, not the hospitality.
